Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company web site and retail salespeople are trained to assist with compliant digital wireless phones. Compliant handsets are available for testing from live phone displays in retail locations. Written materials and promotional literature are provided at the point of sale and on the website addressing the needs of individuals with hearing disabilities. Signage in the retail stores informs customer of the availability of a variety of hearing aid compatible handsets. Customers who use hearing aids are urged to try out a handset before purchasing. Such customers are given a thirty day trial period within which to determine whether the digital wireless phone will work properly with their hearing aids.

Methodology for Functionality Levels

High Tier includes the highest cost handsets. A very high range of features including megapixel cameras, music

player capabilities, and some with qwerty keyboards and WiFi.

Mid Tier includes mid priced handsets with mid range features. All include a camera.

Low Tier includes low cost and a basic feature set. Candy bar or basic flip design may include basic VGA camera. No music capabilities.
